

**a** Multimodal record, one language-model agent per modality, structured evidence

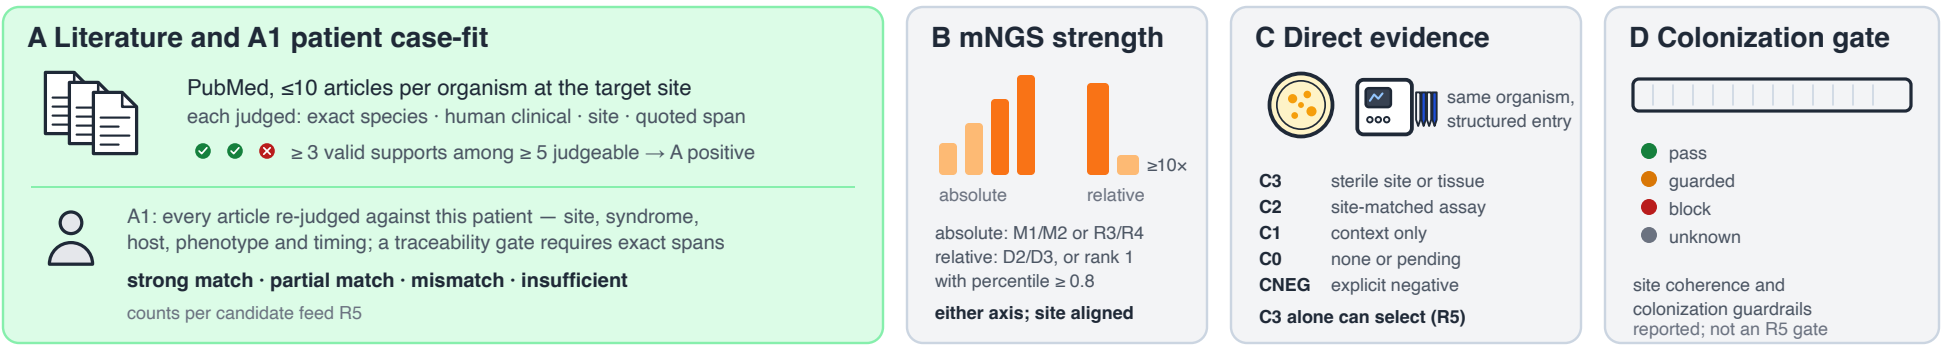

**b** Deterministic selection (v20): tiered sieve, guardrails, language-model safety review

**mNGS candidates**

reads, control codes

**c** Evidence modules computed for every carried candidate

Missing or pending tests are unknown, never negative. Reference labels enter only the evaluation code.

**d** Final rule R5, frozen selection, post-hoc rationale, auditable delivery
