

one dot per admission (n=32); bar, median; line, interquartile range; open dot on the axis, none recorded

names pneumonia, qualified
names pneumonia, unqualified
no pneumonia term

365 chest studies; qualified means the finding is hedged (probably, suspect, favour, cannot be excluded)

Cases 1 and 2: KMH intensive-care series, first pipeline version (17 January 2026). Case 3: registry case; disposition drawn from the serology rule as implemented, delivered record pending.
